

# Advanced Programming

Thorsten Koch / Matthias Miltenberger

## Excercise 5

### **What to do?**

Prepare a 10 minute presentation of your C and ADA codes.

- What design decision did you take?
- How does the code look like?
- Differences between the two versions.
- Tests that have run.
- Maybe some numbers, speed, coverage, metrics, whatever you think is useful.

It is up to you what to present.
