ZIB

The Zuse Institute Berlin (ZIB) is a non-university research institute under public law of the state of Berlin. Within the research group “Mathematical Optimization Methods”, we are offering at the earliest possible date until March 31st 2025

**a research position (m/f/d)
(Postdoc) reference code: WA 32/20
pay grade E14 TV-L Berlin (100%)**

Job description

The goal of the BMBF-funded research laboratory MODAL SynLab (see <http://www.zib.de/projects/modal-synlab>) is the development and implementation of mathematical optimization algorithms for general problem classes, predominantly mixed-integer linear and nonlinear programs, and complex combinatorial structures that are motivated by real-world applications. To this end, we collaborate with partners from academia and industry, with the other MODAL labs, and with developers of state-of-the-art mixed-integer programming software. In conjunction with our own development of the SCIP Optimization Suite our group holds a high level of expertise in computational mathematical research and you can benefit from our modern software development environment and our team-oriented approach to research.

Within this framework, you will be able to define your own research agenda and work closely with PhD students in the group towards the defined goals. The position offers a long-term perspective and you will be able to take on leadership responsibilities.

Your profile

- Excellent PhD degree in mathematics, computer science or related disciplines
- Strong background in discrete optimization and computational mixed-integer programming
- Good programming skills, ideally C, C++, or related languages
- Good command of written and spoken English and German
- Creativity and a high degree of commitment to problem solving

We are offering a friendly working atmosphere with flexible work and meeting times, excellent equipment and a challenging professional environment

as well as

- a comprehensive training in a competent and cooperative team,
- additional pension scheme (VBL),
- 30 days annual leave, flexible working hours (flexitime),
- payment in accordance with TV-L (Collective Agreement for the Public Service of the

federal states), taking into account the relevant professional experience and annual special payment

- and the discounted use of canteens and the sports program of Freie Universität Berlin.

Due to our involvement in major regional cooperative projects, such as the Einstein Center for Mathematics (ECMath), the DFG Cluster of Excellence MATH+, the Berlin Mathematical School (BMS) or the Berlin Institute for the Foundations of Learning and Data (BIFOLD), we have close ties to universities and research institutes in the region.

Although the position is advertised full-time, a part-time agreement is also possible.

The candidature of women is encouraged. Since women are underrepresented in information technology, ZIB is trying to increase the proportion of women in this research area.

Persons with disabilities will be given preference when equally qualified.

Please send your application, quoting the reference code [WA 32/20](#), including a cover letter containing a statement of your research interests, a CV in tabular form with list of publications, academic transcripts, and contact details of two references, by [June 02nd, 2020](#) (date of receipt) to

Zuse Institute Berlin (ZIB)
- Administration -
Takustr. 7
14195 Berlin

or electronically as pdf-form to: jobs@zib.de.
